Re: Mandale Drive Concrete Reconstruction Program, City Project 22-392

Dear Resident:

Sterling Heights City Council has approved the reconstruction of Mandale Drive by DiLisio Construction. Construction is tentatively set to begin with pavement cutting during the week of June 27 or the following week (weather permitting). Traffic will be reduced to one lane in the work area during the project. Alternative entrances and exits to your neighborhood include Amsterdam, Shearing, and Dryden Drive. The grass between the street and sidewalk and your private driveway approach are not included in the repair and shouldn't be disturbed. However, any areas disturbed by the contractor will be restored at the end of the project, including sprinkler repairs.

The project will have 4 phases (see the back side of this letter for more information), and you'll be given written notice at least 24 hours prior to the start of work in your phase. If you are adjacent to a replacement location, you won't be able to access your driveway for the approximately two weeks it will take to complete that phase. Please have your vehicles moved outside of the designated work area upon receipt of this notice. Please do not drive on the fresh concrete until barrels are removed by the City (usually about seven days). This will allow the concrete to become strong enough to tolerate vehicles.

During the project, please place your trash in approved trash/yard waste bags only (avoid trash cans), and it will be picked up by the contractor or GFL on your normal refuse collection day. Mail Service will not be impacted.

Construction information and progress updates of the project can be found at sterling-heights.net/conezone, or to receive regular project updates via email or text, visit sterling-heights.net/notifyme and subscribe to the "Local Road Project: Mandale Drive" alerts or scan the QR code below.

If you have any questions, please contact the Office of Engineering at (586) 446-2726 or akonkle@sterling-heights.net. This road improvement project was made possible as a direct result of the voter-approved Safe Street Millage that was renewed in November 2019.

Sincerely,

Andrew Konkle
 Civil Engineer II
