

Be fire smart

with **electricity** throughout your home.

There are **more than 45,000** home electrical fires each year.

About **half** of these involve lighting equipment or home electrical wiring.

Home electrical fire deaths peak between **midnight and 6 a.m.**

Peak months for electrical fire deaths are **December through March.**

Plug only **one** heat-producing appliance (such as a coffee maker, space heater, or microwave) directly into a wall outlet at a time.

Extension cords should only be used temporarily. Have an electrician install additional wall outlets where you need them.

Never use an extension cord with a heat-producing appliance.
